Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
Office Action Summary	10/808,429	CHEN ET AL.				
Office Action Summary	Examiner	Art Unit				
The MAILING DATE of this communication and	Johnese Johnson	2166				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY WHICHEVER IS LONGER, FROM THE MAILING DA - Extensions of time may be available under the provisions of 37 CFR 1.13 after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period w - Failure to reply within the set or extended period for reply will, by statute, Any reply received by the Office later than three months after the mailing earned patent term adjustment. See 37 CFR 1.704(b).	ATE OF THIS COMMUNICATION 36(a). In no event, however, may a reply be tim vill apply and will expire SIX (6) MONTHS from cause the application to become ABANDONEI	I. sely filed the mailing date of this communication. D (35 U.S.C. § 133).				
Status						
1) Responsive to communication(s) filed on 16 M.	<u>ay 2007</u> .					
2a) ☐ This action is FINAL . 2b) ☒ This	This action is FINAL . 2b)⊠ This action is non-final.					
3) Since this application is in condition for allowar	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4) Claim(s) <u>1 and 3-37</u> is/are pending in the application 4a) Of the above claim(s) is/are withdray						
5) Claim(s) is/are allowed.						
6)⊠ Claim(s) <u>1and 3-37</u> is/are rejected.						
7) Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
9) The specification is objected to by the Examine	r.					
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:						
1. Certified copies of the priority documents have been received.						
2. Certified copies of the priority documents have been received in Application No						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau (PCT Rule 17.2(a)).						
* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Remarks

- 1. In response to the Amendment filed on 16 May 2007, claims 1 and 3-37 are pending. Claim 2 is cancelled.
- 2. The previous claim rejections under 35 USC 112 1st and 2nd and 35 USC 101 (claims 1-2, 5, 7-9, 11, and 33) have been withdrawn. The rejection under 35 USC 101 to claims 13-20 are maintained because although the claims are directed to a system, "the system is in fact software modules, i.e., software per se.

Claim Rejections - 35 USC § 101

- 3. 35 U.S.C. 101 reads as follows:
 - Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
- 4. Claims 13-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 13- 20 are directed to software modules which is *software per se*.

Software per se is also known as nonfunctional descriptive material (See in re
Warmerdam, 33 F3d at 1360, USPQ2d at 1759). The content is not structurally and
functionally interrelated to a computer-readable medium thereby rendering it incapable
of producing a useful, concrete and tangible result and is therefore non-statutory.

Claims must be amended to recite hardware in the body.

Application/Control Number: 10/808,429 Page 3

Art Unit: 2166

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1, 3-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burke et al. (US Pat. No. 6,789,252) in view of Sheard et al. (US Pat. No. 6,208,345).

As to claim 1, Burke et al. disclose:

determining an object definition for an object based upon a collaboration code (see col.

19, lines 22-24); and

Storing said business object definition (see col. 25, lines 23-25).

However, <u>Burke et al.</u> does not explicitly disclose:

receiving an object and a collaboration code

Sheard et al. Discloses:

receiving an object (see col. 31, line 31) and a collaboration code (see col. 14, lines 28-31).

It would have been obvious to have modified the teachings of <u>Burke et al.</u> by the teachings of <u>Sheard et al.</u> to provide an improved data integration system and methodology capable of effectively integrating data produced by

applications of varying technologies (see <u>Sheard et al.</u> col. 2, lines 65-67 and col. 3, line 1).

As to claim 3, Burke et al., as modified, discloses:

wherein said object comprises a business object (see <u>Burke et al.</u> col. 34, lines 26-28 and 37-42).

As to claim 4, Burke et al., as modified, discloses:

forwarding said object and said object definition (see Burke et al. col. 34, lines 45-48).

As to claim 5, Burke et al., as modified, discloses:

wherein said forwarding comprises forwarding said object and said object definition to an application adapter (see <u>Burke et al.</u> col. 34, lines 26-28 and 37-42 and col. 42, lines 64-66).

As to claim 6, Burke et al., as modified, discloses:

processing said object based upon said object definition in said application adapter (see Burke et al. col. 6, lines 20-21).

As to claim 7, Burke et al., as modified, discloses:

wherein said collaboration code determines how data from a second object is mapped to said object (see <u>Burke et al.</u> col. 21, lines 1-8).

As to claim 8, Burke et al. disclose:

wherein said collaboration code determines how said object is derived from said second object (see <u>Burke et al.</u> col. 21, lines 1-5).

As to claim 9, Burke et al., as modified, discloses:

wherein said collaboration code determines how said object is derived from said second object and a second object definition (see <u>Burke et al.</u> col. 21, lines 1-5).

As to claim 10, Burke et al., as modified, discloses:

further comprising receiving said second object definition (see <u>Burke et al.</u> col. 34, lines 26-28 and 37-42 and <u>Burke et al.</u> col. 21, line 3 – second object).

As to claim 11, Burke et al., as modified, discloses:

wherein said determining comprises determining said object definition for said object based upon said collaboration code and said second object definition (see <u>Burke et al.</u> col. 17, lines 48-49 and <u>Burke et al.</u> col. 21, line 3 – second object).

As to claim 12, Burke et al., as modified, discloses:

wherein said receiving comprises receiving said object and said collaboration code from a broker (see <u>Burke et al.</u> col. 34, lines 26-28 and 37-42; wherein the means allows data to be exchanged/ integrated in different formats).

Art Unit: 2166

As to claim 13, Burke et al. discloses:

means for determining an object definition for said object based upon said collaboration code (see col. 17, lines 48-49 and col. 20, lines 10-11).

However, <u>Burke et al.</u> does not explicitly disclose:

means for receiving an object and a collaboration code.

Sheard et al. disclose:

means for receiving an object (see col. 31, line 31) and a collaboration code (see col. 14, lines 28-31).

It would have been obvious to have modified the teachings of <u>Burke et al.</u> et al. by the teachings of <u>Sheard et al.</u> to provide an improved data integration system and methodology capable of effectively integrating data produced by applications of varying technologies (see <u>Sheard et al.</u> col. 2, lines 65-67 and col. 3, line 1).

As to claim 14, Burke et al., as modified, discloses:

wherein said object comprises a business object (see <u>Burke et al.</u> col. 34, lines 26-28 and lines 37-42).

As to claim 15, Burke et al., as modified, discloses:

means for forwarding said object and said object definition to an application adapter (see <u>Burke et al.</u> col. 34, lines 26-28 and lines 37-42 and <u>Burke et al.</u> col. 42, lines 64-66).

As to claim 16, Burke et al., as modified, discloses:

wherein said collaboration code determines how data from a second object is mapped to said object (see Burke et al. col. 21, lines 1-8).

As to claim 17, Burke et al., as modified, discloses:

means for receiving a second object definition, wherein said collaboration code determines how said object is derived from said second object and said second object definition (see <u>Burke et al.</u> col. 21, lines 1-5).

As to claim 18, Burke et al., as modified, discloses:

wherein said means for determining comprises means for determining said object definition for said object based upon said collaboration code and said second object definition (see <u>Burke et al.</u> col. 17, lines 48-49 and <u>Burke et al.</u> col. 21, line 3 – second object).

As to claim 19, Burke et al., as modified, discloses:

wherein said means for receiving comprises means for receiving said object and said collaboration code from a broker (see <u>Burke et al.</u> col. 34, lines 26-28 and 37-42; wherein the means allows data to be exchanged/ integrated in different formats).

As to claim 20, <u>Burke et al.</u>, disclose:

détermines a first object definition based upon said collaboration code (see col. 19, lines 22-24).

However, Burke et al. do not explicitly disclose:

a reverse object discovery agent that receives a first object and a collaboration code from a broker.

Sheard et al. disclose:

a reverse object discovery agent that receives a first object (see col. 31, line 31) and a collaboration code (see col. 14, lines 28-31).

It would have been obvious to have modified the teachings of <u>Burke et al.</u> by the teachings of <u>Sheard et al.</u> to provide an improved data integration system and methodology capable of effectively integrating data produced by applications of varying technologies (see <u>Sheard et al.</u> col. 2, lines 65-67 and col. 3, line 1).

As to claim 21, Burke et al., as modified, discloses:

a broker that receives a second object and a second object definition and that generates said first object using said collaboration code (see <u>Burke et al.</u> col. 34, lines 26-28 and 37-42 and col. 20, lines 21-23).

As to claim 22, <u>Burke et al.</u>, as modified, discloses:

wherein said collaboration code determines how said first object is derived from said second object (see <u>Burke et al.</u> col. 21, lines 1-5).

Art Unit: 2166

As to claim 23, Burke et al., as modified, discloses:

wherein said collaboration code determines how said first object is derived from second object and said second object definition (see Burke et al. col. 21, lines 1-5).

As to claim 24, Burke et al., as modified, discloses:

an application adapter that receives said first object and said first object definition from said reverse object discovery agent (see <u>Burke et al.</u> col. 34, lines 26-28 and lines 37-42 and col. 42, lines 64-66).

As to claim 25, Burke et al., as modified, discloses:

determining whether an object conforms to a known object definition (see col. 21, lines 12-15); and

Storing said business object definition (see col. 25, lines 23-25).

However, <u>Burke et al.</u> does not explicitly disclose:

requesting a collaboration code and an input object definition if said object does not conform to a known object definition; and

receiving an object and a collaboration code

Sheard et al. Discloses:

requesting a collaboration code (see col. 14, lines 28-31) and an input object definition if said object does not conform to a known object definition (see col. 31, line 31).

receiving an object (see col. 31, line 31) and a collaboration code (see col. 14, lines 28-31).

Page 10

It would have been obvious to have modified the teachings of <u>Burke et al.</u> by the teachings of <u>Sheard et al.</u> to provide an improved data integration system and methodology capable of effectively integrating data produced by applications of varying technologies (see <u>Sheard et al.</u> col. 2, lines 65-67 and col. 3, line 1).

As to claim 26, <u>Burke et al.</u>, as modified, discloses: analyzing said collaboration code and said input object definition (see <u>Burke et al.</u> col. 21, lines 1-8).

As to claim 27, <u>Burke et al.</u>, as modified, discloses: creating a new object definition based upon the results of said analyzing (see <u>Burke et al.</u> col. 20, lines 21-23).

As to claim 28, <u>Burke et al.</u>, as modified, discloses: forwarding said object if said object conforms to a known object definition (see <u>Burke et al.</u> col. 34, lines 45-48).

As to claim 29 Burke et al., as modified, discloses:

wherein said object comprises a business object (see <u>Burke et al.</u> col. 34, lines 26-28 and lines 37-42).

As to claim 30, Burke et al., as modified, discloses:

forwarding said new object definition to an application adapter (see <u>Burke et al.</u> col. 34, lines 26-28 and lines 37-42 and <u>Burke et al.</u> col. 42, lines 64-66).

As to claim 31, Burke et al., as modified, discloses:

receiving a subscription from said application adapter for said new object definition (see Burke et al. col. 50, lines 61-63; wherein the notification subscriptions are received and configured).

As to claim 32, Burke et al. as modified, discloses:

forwarding said object in response to said subscription (see <u>Burke et al.</u> col. 34, lines 45-48 and col. 50, lines 58-63).

As to claim 33, Burke et al., disclose:

instructions for determining a business object definition for said object based upon said collaboration code (see <u>Burke et al.</u> col. 15, line 53 and col. 17, lines 48-49). Instructions for storing said business object definition (see <u>Burke et al.</u> col. 15, line 53 and col. 17, lines 48-49.

However, <u>Burke et al.</u> does not explicitly disclose:

Art Unit: 2166

instructions for receiving an object and a collaboration code

Sheard et al. Discloses:

instructions for receiving an object and a collaboration code (see <u>Sheard et al.</u> col. 12, lines 28-29).

It would have been obvious to have modified the teachings of <u>Burke et al.</u> by the teachings of <u>Sheard et al.</u> to provide an improved data integration system and methodology capable of effectively integrating data produced by applications of varying technologies (see <u>Sheard et al.</u> col. 2, lines 65-67 and col. 3, line 1).

As to claim 34, Burke et al., as modified, discloses:

wherein said object comprises a business object (see <u>Burke et al.</u> col. 34, lines 26-28 and lines 37-42).

As to claim 35, Burke et al., as modified, discloses:

instructions for forwarding said new object definition to an application adapter(see <u>Burke et al.</u> col. 34, lines 26-28 and lines 37-42 and <u>Burke et al.</u> col. 42, lines 64-66).

As to claim 36, Burke et al., as modified, discloses:

instructions for receiving a subscription from said application adapter for said new object definition (see <u>Burke et al.</u> col. 15, line 53 and col. 50, lines 61-63; wherein the notification subscriptions are received and configured).

As to claim 37, Burke et al., as modified, discloses:

instructions for forwarding said object in response to said subscription (see <u>Burke et al.</u> col. 15, line 53, col. 34, lines 45-48 and col. 50, lines 58-63).

Response to Arguments

7. Applicant's arguments with respect to claim1, 13, 20, 25, and 33 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Johnese Johnson whose telephone number is 571-270-1097. The examiner can normally be reached on 4/5/9.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hosain Alam can be reached on 571-272-3978. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
